ONETREEPLANTED

Unfortunately, bees and other pollinators are declining in abundance in many parts of the world largely due to higher temperatures associated with climate change.

The Flowers for Flowers Program is a Bee Conservation project through One Tree Planted to educate and get a better understanding of the importance of bees to our planet.

One Tree Planted is a non-for-profit organization which restore forests and protects biodiversity by planting trees and restoring habitats and ecosystems for our important pollinators such as bees and other fauna.

Our first ever Flowers for Flowers Collection consists of artisanal designed floral bouquets inspired by flowers that bees love to nectar on.

Each floral bouquet will generate a donation from its purchase directly to One Tree Planted to support this initiative.

Bee the Difference in making our planet more sustainable for our future generations.

Here are more ways to support bee conservation!

Plant a Bee Garden

Go Chemical-Free for Bees

Provide Trees for Bees

Protect Ground Nesting Bees!

Teach Tomorrow's Bee Stewards!
